## **DETAILED ACTION**

### ***Drawings***

The drawings are objected to because the reference characters are less than 1/8 inch in height as required by 37 CFR 1.84(p)(3). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Claim Objections***

Claims 1 and 2 are objected to because of the following informalities: In claim 1, the parenthetical expressions in lines 5, 9, 12, 14, 15, 18, 21 and the last line appear unnecessary and should be deleted. Appropriate correction is required.

The claims otherwise contain allowable subject matter.

***Allowable Subject Matter***

Claim 3 is allowed.

***Conclusion***

The engine fuel control systems made of record and not relied upon are considered pertinent to applicant's disclosure.
